

Technology & Business Solutions introduces **Stratosphere, the GovCon Cloud for QuickBooks**, the first on-line suite for QuickBooks that wraps your system with unrivalled security, fully compliant mobile timekeeping, and comprehensive project reporting *with automated labor, rates and revenue*. Perfect for small- to mid-sized government contractors and professional services firms that need a vibrant ERP to support disciplined and responsive project management.

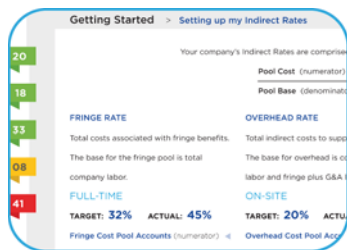

Supporting compliance, real-time alerts pop on your Stratosphere Dashboard whenever closed QuickBooks months are modified, and when saved or submitted Time-Ade timesheets are edited. Personalize your dashboard with additional project performance and business process alerts too.

Access your QuickBooks and your Stratosphere Apps from the TBS Cloud with your single TBS account log-in. TBS delivers a true Enterprise Hosting Platform with SOC2 Type II assurance and ITAR compliance. All your hosted data is 256-AES Encrypted In-Flight and Encrypted At-Rest.

Time-Ade is a delightfully simple and smart time-keeping app for small- to mid-sized project-based businesses. Set-up is a snap, and flexible “Charge Categories” make timesheet entry and approval easy. Time-Ade is available on any desktop, tablet and smartphone device.

Your Stratosphere system is powered by on-line Labor, Indirect Rate and Revenue Engines, augmenting QuickBooks with true project-based accounting and reporting capabilities. Configuring your rates – for Fringe, Overhead and G&A – is easy, and handled with just a single set-up screen.

Stratosphere also includes the game-changing real-time reporting app, Claritas. Ready to go “out of the box” with NO consulting, all Claritas reports feature live labor details (*including unprocessed Time-Ade timesheets*) – Project Status, a LIVE Statement of Indirects, Project Forecasting and more.

**STRATOSPHERE works automatically with your existing QuickBooks Pro or QB Enterprise system. Add Time-Ade, Claritas or TBS Hosting – or add all three – and Stratosphere is ready in 48 hours.**
